SUMMARY

Data and analytics leader with a track record of designing healthcare data integrations, data governance, and BI solutions across a multi-site organization. Partners with executives and cross-functional teams to deliver trusted, secure data across clinical, revenue cycle, financial, operational, and human resources domains.

TECHNICAL EXPERTISE

Data Integration & Engineering: SQL • Oracle • SSIS (ETL) • Python • Java • PowerShell • HL7 • FHIR • RPA
Analytics & Visualization: Power BI • DAX • Power Automate • Power Apps • SAP Crystal Reports
Governance & Security: Data Governance • AI Governance • Data Reconciliation • Database Administration • RLS
Healthcare Data & Systems: Clinical • Revenue Cycle • Financial • Operational • HR • Oracle Cerner Millennium
Advanced Analytics & AI: Predictive Modeling • Machine Learning • Statistical Testing • RAG • Agentic Workflows

PROFESSIONAL EXPERIENCE

Director of Business Intelligence | BestSelf Behavioral Health, Buffalo, NY — Jun 2023 – Present

- Led healthcare data integration across clinical and operational systems, partnering with internal and external teams to connect the EHR with third-party systems for hospital discharge and appointment data via HL7 messaging, plus FHIR integrations for multiple use cases.
- Administered Oracle Cerner and HR databases, including server administration, access and security management, data loading and reconciliation, and the SQL queries and reports that support HR and enterprise reporting needs.
- Spearheaded Oracle Cerner Millennium analytics implementation following an EHR migration, recovering and preventing $3M in uncollected revenue.
- Designed and directed an organization-wide data governance strategy, ensuring full regulatory compliance and establishing readiness for AI/ML initiatives.
- Implemented organization-wide row-level security (RLS) in Power BI to strengthen compliance and secure sensitive data, enabling personalized dashboards that drove a 45% increase in treatment documentation compliance within six months.
- Automated revenue cycle data workflows with Robotic Process Automation (RPA) and custom scripts, reducing manual effort by 35%.
- Built an internal Retrieval-Augmented Generation (RAG) system that makes policies, procedures, and EHR documentation instructions instantly searchable.

Quality Improvement Project Manager | BestSelf Behavioral Health, Buffalo, NY — Mar 2022 – Jun 2023

- Led a $2M cost-savings initiative optimizing prescriber workforce allocation through advanced modeling.
- Developed and deployed a statistical analysis system to restructure staffing levels organization-wide.
- Partnered with clinical and operational stakeholders to improve SAMHSA, CCBHC, HEDIS, and VBC metrics.

Office Manager | BestSelf Behavioral Health, Buffalo, NY — Mar 2020 – Jun 2022

Quality Improvement Administrative Assistant | Catholic Health System, Buffalo, NY — Sep 2017 – Jan 2019

PROJECTS

- **ResumeOptimizer.cloud (AI SaaS)** | Built and deployed a SaaS app that scores resumes against job descriptions, using a FastAPI backend, Supabase, Stripe, and multiple LLM providers, containerized with Docker behind Caddy.
- **Automated Abstraction of Youth Mental Health Narratives (DrivenData)** | Built an end-to-end Python pipeline (pandas, scikit-learn, XGBoost) that turns unstructured narrative text into features, then trains and evaluates 23 classification models using F1 scores.
- **Flu Vaccine Prediction (Capstone)** | Built a Python ML pipeline (pandas, scikit-learn) that predicts H1N1 and seasonal flu vaccine uptake from survey data, evaluated with accuracy and AUC-ROC.
- **Additional projects** | Kaggle AI-generated text detection (ML); Python delivery routing (hash table, greedy algorithm); three Android apps on Google Play.

EDUCATION

Master's Degree | Business Administration | Jacksonville State University
Bachelor's Degree | Computer Science | Western Governors University
